

DoangJoo "Alan" Synn

Ph.D. Student in Computer Science · Georgia Institute of Technology

Advised by [Prof. HyunJoo Oh](#) and [Prof. Sehoon Ha](#)

alansynn@gatech.edu · <https://alansynn.com>

Research Interests

My research explores computational design and creativity, with a focus on representing and supporting creative intent in generative and interactive systems. I build models and interfaces that translate high-level human intent into expressive, controllable outcomes, spanning domains such as computer graphics, motion synthesis, and kinematic design.

Education

Georgia Tech, Ph.D. in Computer Science

2022–Present

- [School of Interactive Computing](#); advised by Profs. [Oh](#) & [Ha](#)
- Research: computational design, mechanical artifacts, and motion synthesis (HCI/Graphics)

Korea University, M.Eng. in ECE

2020–2022

- Thesis: *On Efficient Data Delivery for Machine Learning Systems*

Korea University, B.Eng. in EE

2012–2020

Experience

Ph.D. Research Intern, Dolby Laboratories

2024–2025

- Built a time-series, multimodal datastore supporting low-latency media analytics in the Experience Delivery Lab.

MLOps Engineering Intern, LG Uplus Corp.

2023

- Led **DeepCrunch**, a model-compression library supporting multi-backend AI inference for efficient edge deployment.

Research Scientist, Protopia AI Inc.

2021–2022

- Built **Stained-Glass**, a privacy-preserving deep-learning framework enabling inference without raw-data exposure.

Cloud Architect · AWS Educate Cloud Ambassador

2020–2022

- Led engineering for four startup services, translating ambiguous product requirements into production backend systems.

Server Engineer, Flysher Inc.

2019

- Shipped backend features for four social-game titles; one reached Facebook's global top 10.

System Engineer, AKA Intelligence (Musio)

2017–2019

- Designed embedded Linux boards and firmware for **Musio**, a deployed social robot.
